

## Wireless pocket computing

### Stay connected wirelessly

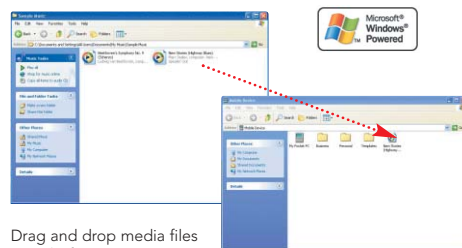

The Pocket PC e800 series offers built-in wireless connectivity with a choice of Wi-Fi™ or Bluetooth™ models giving you the freedom of wireless access to your company network, e-mail and the Internet – in the office, at home and in 'hot spot' locations in restaurants, airports and hotels around the world. The Bluetooth model allows you to connect with other Bluetooth enabled devices such as mobile phones, printers, scanners, GPS navigation systems and headsets or wirelessly synchronise data to a desktop or notebook PC.

### Easy connectivity with ConfigFree™

Toshiba's unique ConfigFree software included with the e800 Wi-Fi model provides easy configurations for your 802.11b wireless environment. Save multiple profiles to suit various locations for a hassle-free connection to the corporate network, your favourite hotspots or the home wireless environment. ConfigFree also features a handy wireless access point locator for added ease of use.

### Portable Multimedia Entertainment unit

Experience the Pocket PC e800 as an ultra mobile entertainment unit and mini games console where you can surf the Net, enjoy MP3 music, create a digital photo album, view videos or play full-screen interactive games anywhere. Versatile and easy to use, the navigational buttons are now pre-programmed for Windows Media™ Player making it easier than ever before. You only need one device to do it all.

Drag and drop media files straight from your PC

The Toshiba Pocket PC e800 is a next generation Microsoft® Windows® Powered Pocket PC.

**Pocket PC e800**

The new look Toshiba Pocket PC e800 series features a larger and brighter 4" screen with VGA capability. The e800 offers built-in wireless connectivity with your choice of Wi-Fi™ or Bluetooth™ models, integrated expansion for easy customisation, the ultimate in data safety technology and new software including Text-to-Speech and Voice Command for communicating with your Pocket PC. Have your emails read to you at the flick of a button or by your own voice command.

Voice recorder button

3-way scroll button

Advanced Lithium-Ion power pack

Slimline design at only 16.7mm wide

#### Larger and brighter colour display

The Pocket PC e800 boasts a new ultra-bright 4.0" diagonal TFT display featuring innovative Transreflective technology, 65,536 colours and up to 480 x 640 VGA resolution. With high contrast ratio and rich colour saturation, you'll experience crisper, clearer images and text for easy readability both indoors and outdoors.

#### Maximum productivity

The robust new Pocket PC e800 features the Intel® Xscale PXA-263 processor at 400 MHz allowing you to run larger and more powerful applications on your Pocket PC. Packed with 128MB of RAM, 32MB Flash ROM and 32MB of NAND Flash memory, it provides abundant storage for digital and multimedia files, business applications and more.

#### Protecting your data

The Pocket PC e800 has three levels of data back-up for added peace of mind. Firstly, a 72 hour data backup power keeps your data safe for up to three days after your main battery runs out. Secondly, 32MB of NAND non-volatile memory keeps data stored here safe even after battery depletion. Thirdly, Toshiba's Auto-Backup feature lets you automatically backup your Pocket PC every day or week to your NAND memory or storage card.

#### Text-to-Speech and Voice Command

More than just a simple data device, the Pocket PC e800 series includes new, convenient hands-free applications including Text-to-Speech and Voice Command for communicating with the e800. Have your emails read to you at the flick of a button or by your own voice command.

#### Ultra-versatile expansion

Multiple expansion slots allow you to quickly and easily add storage or extra functionality. Use the integrated Secure Digital (SD®) I/O and CompactFlash (CF) slot to store or transfer data and provide even more expansion capabilities. Connect to cameras, scanners and more. Beam data wirelessly between devices via the integrated Infrared port. Even deliver a presentation from your Pocket PC to a portable projector via the optional Presentation Pack.

#### Connecting is so simple

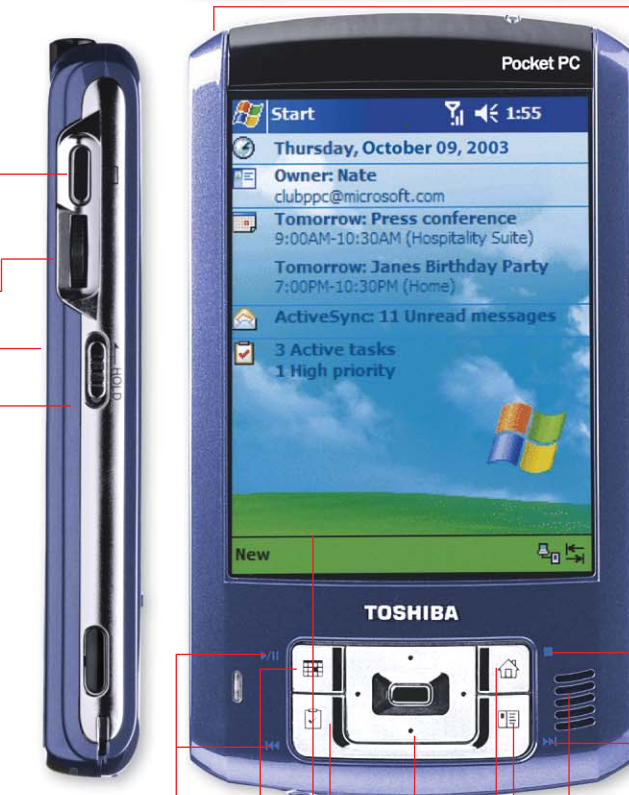

Synchronise your Pocket PC e800 with your PC by connecting it to any Notebook or desktop PC using Windows (95+) via the USB cradle or optional serial cable. You can also plug in USB-based devices such as keyboards, printers, storage disks, mice, and many other industry standard USB peripherals that support Pocket PCs (via optional expansion cable or Presentation Pack).\*

#### Enhanced Software

Work smarter with Windows® Mobile™ 2003 for the Pocket PC operating system featuring all your favourite Pocket PC versions of Microsoft® software including Word, Excel, Outlook, Internet Explorer, MSN Messenger and Windows® Media Player pre-installed and ready to go. Further software enhancements include a World Clock, Auto Backup and Voice Recorder for added functionality.
